South Bend 24, Indiana

Issued for Information of Producers  
Who Are Not Members of Cooperative Associations

Vol. V, No. 5

May 1961

APRIL BASE PRICE \$4.01

Dairy farmers will receive a base price of \$4.01 for April 1961 deliveries of Grade A base milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The base price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.3 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This price is 18 cents more than the base price of April 1960.

APRIL EXCESS PRICE \$3.23

April 1961 deliveries of Grade A excess milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order will be paid for at the rate of \$3.23 per hundredweight for 3.5 percent milk and adjusted by the same differential of 7.3 cents as is used for base milk. These minimum prices are subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge. For comparative purposes, a uniform price of \$3.91 per hundredweight was computed, which is 3 cents less than the March 1961 uniform price, but 19 cents more than the computed uniform price of April 1960.

PRODUCER RECEIPTS

Daily production for the market as a whole is down 1.5 percent from March; however, daily herd production is up. This means that with fewer producers, they produce almost as much milk as in March. When a comparison is made with a year ago, we find that daily production is down 30 percent, but daily herd production is up 88 pounds per producer per day.

CLASS I SALES

Class I sales decreased 4.37 percent from March on a daily basis. Utilization of producer receipts in Class I was 73.4 percent as compared with 75.6 percent for March 1961 and 72.9 percent for April 1960. Even though there was a decrease in Class I sales from March, it is about the same proportion that it was in 1960, when April sales were compared with March.

CLASS I PRICE

The Class I price for the May 1961 delivery period will be \$4.13 per hundredweight for 3.5 percent milk. This price was computed by adding \$0.90 per hundredweight to the average condensery pay price (\$3.23) and a zero supply-demand adjustment. The supply-demand adjustment for the June 1961 delivery period will be a plus 2 cents.
